Overview

Apprenticeship has been a cornerstone of technical education and a viable post-secondary learning option in Wisconsin for over a century. “On-the-job learning” of an employed apprentice, coupled with applied learning at the technical college, continues to be a productive way for employers to train their workforce and for employees to gain crucial knowledge and skills in their career field.

What We Do

The Bureau of Apprenticeship Standards (BAS), a branch of the Wisconsin Department of Workforce Development, regulates the training and certification for apprenticed trades in conjunction with employers, the Wisconsin Technical College System, and trade advisory committees. FVTC supports the educational experience of apprentices by partnering with district employers to offer theory and technical coursework, while the employers support on-the-job technical training.

For Whom

Apprenticeship employers are located throughout Wisconsin, with most apprenticeship completers working within the FVTC district. Employers and local advisory committees sponsor apprentices in selected industrial, construction, and service trades for two to six years as paid employees and are responsible for teaching trade skills on the job. Some employers hold instruction for their apprentices at off-campus training centers, while others have apprentices participate in instruction on the FVTC campus. All instruction is delivered by FVTC-certified instructors.

At What Cost

Apprenticeship costs include instructional supplies as well as instructional staff. Those costs are recovered with both district funds and tuition for apprenticeship coursework. FVTC supports ongoing investments to maintain state-of-the-art dedicated laboratory facilities for apprenticeship programs. This level of service for district apprentice trades is frequently referenced as an effective model of apprenticeships and helps FVTC remain a leader among apprentice programs in the WTCS.
