ATI TEAS Version 7 question types include:

- Multiple Select items: Students will be presented with a list of four or more possible answers to a question and more than 1 may be correct. There will be a note on these question types to “Select all that Apply.” To answer the question correctly, the student must select all correct answers. If all correct answers are not selected, then the question is incorrect. No partial credit is given.
- Supply Answer items: This question type requires students to provide the answer to the question or “fill in the blank” without a set of options. Answers may be text or numerical values.
- Hot Spot items: These questions include an image with two to five clickable areas. Students are required to click on the area of the image identified as the correct response.
- Ordered Response items: These questions require students to place a set of response options in the correct order. Students drag between four and six response options from a box on the left to an empty box on the right. The question is answered correctly only if the student places all correct options in the correct order within the box on the right. If an option is out of order, then the question is incorrect. No partial credit will be given.
