In 2018, Fox Valley Technical College partnered with the Social- og Sundhedsskolen (Basic Health Care College) in Denmark to a student exchange program between the two institutions in the healthcare field. The idea of the exchange is to bring students from Denmark to FVTC for two weeks during the Fall Semester to show them the academic, professional, and cultural components of Appleton, the Fox Valley, and Wisconsin. They will engage and interact with locals and professionals and experience life in the U.S. with a group of FVTC students.

After the visit from the Danish students, FVTC students will reciprocate the opportunity and visit Denmark for two weeks the following Spring semester (tentative late May 2020). FVTC students will then have a chance to live and learn the Danish language and culture while engaging with the same students that visited FVTC and experiencing cross-cultural exchanges in a fun environment with professional, academic, and cultural activities.

The visit to Denmark is filled with activities, as well as career-specific experiences in the healthcare field. You will enroll in FVTC’s three-credit International Professional Field Study Course in the Spring of 2020. This is a great opportunity to get an insight into another culture, learn a language, build your global resume, and meet people from around the world.
