

Student Name: \_\_\_\_\_ FVTC Program \_\_\_\_\_

**Tuberculin Skin Testing (TB Testing)**

**IMPORTANT – Complete TB Tests BEFORE getting MMR or Varicella SHOTS**

A **two-step Mantoux intradermal tuberculin skin test** is required by the clinical agencies associated with Fox Valley Technical College students. One step is documentation of both the administration AND the results of the reading 48-72 hours after test administration. You need to repeat this process for the second step at least 7 days after first test. Results must be read at the same health care organization where administered.

**Tuberculin skin test:** Is there history of a positive TB skin test? Yes \_\_\_\_\_ No \_\_\_\_\_

**If positive TB test:** a chest x-ray or TB blood test must be done when entering the program and a copy of the chest x-ray report or lab report for tb blood test must be uploaded to Viewpoint.

Name of clinic/facility administering TB test: \_\_\_\_\_

**Test #1**

Date #1 applied: _____	Time: _____	AM PM	Site of injection: Left Right Forearm <small>Circle One</small>
Manufacturer Expiration date: _____	Lot #: _____	MDV* Expiration Date: _____	
Signature of person applying the skin test: _____			
Date #1 read: _____	Time: _____	AM PM	Test Results: _____ mm
			Test result: _____ negative _____ positive
Signature of person reading & interpreting skin test: _____			

\*Multi Dose Vial

**Test #2**

Date #2 applied: _____	Time: _____	AM PM	Site of injection: Left Right Forearm <small>Circle One</small>
Manufacturer Expiration date: _____	Lot #: _____	MDV* Expiration Date: _____	
Signature of person applying the skin test: _____			
Date #2 read: _____	Time: _____	AM PM	Test Results: _____ mm
			Test result: _____ negative _____ positive
Signature of person reading & interpreting skin test: _____			

\*Multi Dose Vial

**Complete TB testing, save as a .pdf and upload to your Viewpoint account.**
