High school students have a head start by earning Dual Credits or by participating in Start College Now. Not only can they earn their college degree more quickly, they can save money too.

Dual Credit

A Dual Credit class is a technical college course taught by a Fox Valley Technical College Dual Credit certified high school teacher at the high school. A high school student earns credit at their high school and at the technical college at no cost to the student or their school district.

In addition to getting a first-hand view of the college experience, students earn both high school and college credit at the same time by taking classes at an FVTC campus. Start College Now is a great alternative when Dual Credit classes are not available.
