At Caravel Autism Health, we believe that every child with autism deserves an independent, happy life and to connect with the world. Helping children on the autism spectrum and their families is our singular focus.

We work in partnership with families to design customized autism treatment programs. Our programs are rooted in the principles and science of Applied Behavior Analysis (ABA) therapy. We create real-world learning experiences that help children on the autism spectrum build a wide range of skills and learn to connect more fully with others. We serve families throughout the greater Chicago, Green Bay, Madison, Milwaukee and Wausau areas.

At Caravel, your work truly makes a difference! As a Behavior Technician, you'll interact with children on the autism spectrum, in their own homes. We utilize a results-oriented approach called applied behavior analysis, which involves observing how our clients react to their environment and how they respond to people around them. You'll engage these special kiddos in fun activities to help build their skills and social awareness and document their progress. No experience is required and we provide paid training.

At Children's Hospital of Wisconsin, we believe kids deserve the best. Children's Hospital of Wisconsin in Neenah is the only hospital in the Fox Valley dedicated exclusively to the care of kids. Our pediatric care providers know that little bodies respond differently to illness and treatment. Outstanding care providers, coupled with kindhearted care and explanations kids can understand, makes Children's Hospital of Wisconsin the best choice for your sick or injured child.

We offer a wide variety of rewarding career opportunities and are seeking individuals dedicated to helping us achieve our vision of the healthiest kids in the country. If you want to work for an organization that makes a difference for children and families, and encourages you to be at your best every day, please apply today.
