**MONITORING**

**Performance Monitoring: Associate Degree Programs, Technical Diploma Programs and Certificates**

Chris Matheny provided a review of the monitoring report. This report assesses the College’s performance in delivering associate degree, technical diploma, and certificate level programs which provide the skills and knowledge necessary to address occupational competencies from initial job-entry to advanced certification. Through this programming, FVTC serves its District by providing employers with an educated workforce that works to address the health, safety, and business needs of local residents.

In 2012-13, enrollments continued to flatten and shrink in some occupational areas reflecting the impact of a recovering economy. Although graduates are at a historically high level, a gap persists in the production of skilled workers compared to skill needs of employers particularly in the manufacturing sector.

As the outlook on the economy becomes a bit brighter, our graduates are finding employment at an even stronger rate. Eighty nine percent of graduates were employed six months after graduation. This is certainly a testament to the effectiveness of our occupational training programs and talented instructional staff.
